

Accessing the Feedback Review Indicator

In the Gradebook, instructors now have an enhanced ability to monitor student engagement with assessment feedback. An indicator on the student Overview page now displays whether a student has reviewed the feedback for a given assessment.

When a grade is posted, the indicator includes a label of **Not reviewed** with the existing **Completed** label in the Status column. When the student reviews the feedback, the status updates to **Reviewed** with a review timestamp.

If the new grade indicator is reset for the assessment, such as when a grade is updated or if the assessment has multiple attempts, the timestamp updates when the student reviews the feedback again. If all attempts are deleted, the **Not reviewed** or **Reviewed** label is removed.

The Instructor Gradebook view has **Reviewed** and **Not Reviewed** labels in the **Status** column.

Item Name	Due Date	Status	Grade
Discussion No participation	9/26/25	No submission	50 / 100
Assignment 1 attempt submitted	2/12/25	Completed Reviewed	82.5 / 100
Astronomy in Everyday Life Unlimited attempts possible (Late)	8/28/24	No submission	0 / 100
Check your knowledge 1 attempt submitted	4/25/24	Completed Not Reviewed	40 / 50
Practise test 1 attempt submitted (1 Late)	2/8/24	Completed	39 / 50
Exploring the Invisible: Probing the Depths of Dark Matter 1 attempt submitted	12/31/24	Completed Not Reviewed	30 / 100
Peer review (Late)	2/25/25	No submission	50 / 100
