

Adding a Simple Syllabus to the Content Menu

To add your Simple Syllabus link:

1. In the **Course Content**, locate the + sign at the location in which you would like to place the **Simple Syllabus** link. Click the + sign and choose **Content Market** from the options.

2. Once the **Content Market** choices populate, scroll down to **Simple Syllabus** and choose the + sign to create the link at the location where you selected the initial + sign.

3. If for some reason you have placed the link in the wrong location, you can move the link by selecting vertical ellipse columns on the left side of the panel and then drag the component to the proper location. It will then snap into the location as you move the link. Please make sure that the visibility options are set to be viewable when the course begins.
